## Big Year for Relocations

GOING SOMEWHERE?

WE HAVE A FEW RELOCATING

REMINDERS FOR YOU:

EXPERIENCE

EQUIPMENT

EMPLOYEES

The first of the year is always busy with relocation projects. Whether it's making room for a new model in your existing plant or relocating an entire production line across the country, our first quarter always explodes with moving projects. When it comes to selecting your partner for relocating, there's a few things you need to consider: **Experience, Equipment and Employees.**

**Experience** is one of the most important pieces to consider. Big machines, especially older models have unique elements. It takes a skilled mover to identify the best way to lift and transport. Then, you also need to consider the surprises. Last month when relocating a plant to another state, we discovered a surprise that we thought was going to delay transport for up to two days. Our project manager, who had over 20 years of rigging experience, quickly identified the issue, resolved it on site without any assistance and the move continued under deadline.

Access to the **Right Equipment** is essential in today's moves. Each piece must be in prime working condition and available. A full turnkey relocation project requires a variety of machines being utilized to their maximum potential. It saves you time and money when your rigger has the equipment (vs outsourcing to another company). With our extensive inventory, you know we will always have the equipment you need.

**Employees** are the foundation of a relocation project. Because most relocation's are on a tight schedule, the team must understand and respect the importance of being on time, working until the job is done and meeting or exceeding our customer's expectations. Our team is dedicated to making sure your relocation is done on time in a professional manner. Choosing a moving partner with skilled employees is one of the most critical decisions you will make.

Disconnect to reconnect, one call to Associated Industrial Riggers gets it done! We can help your people, or we can do the entire job at hourly or contract rates. To see photos of recent relocation jobs, [Click Here.](#)

## Versa-Lifts Are Designed For **VERSATILITY**

Most recently, we added a new Versa-Lift 25/35 and a Versa-Lift 60/80 to our equipment inventory. These join the equipment list along with our existing 40/60 Versa-Lifts.

Designed with versatility in mind, the 60/80 Versa-Lift (in photo) can easily lift loads of 60,000 to 80,000 pounds. And if the counterweight is extended 48", this forklift can even lift 100,000 pounds!

All of these lifts have hydraulic booms and 8' forks. The Versa-Lifts are state-of-the-art machines built with only one thing in mind...Moving Machinery. The machines are available for rent by the day, week or month.
