HELPING CUSTOMERS SAVE TIME AND MONEY WITH THE 140

As manufacturing changes, we are seeing equipment such as presses, and dies become heavier and heavier. On a regular basis, we lift 105,000 lb dies and presses for our customers, sometimes on a daily or weekly basis. And, as you know, that means a day to setup a gantry, a day to move and a breakdown install day - that's 3 days! Many of our customers are updating their operations with these newer, heavier production elements, but they don't have the time traditional rigging equipment requires for the project. That's one of the main reasons we searched and added this new lift to our inventory - to save our customers time and money!

I'd like to introduce you to the
140.

This is one of, if not the most

powerful lift in the United States.

The 140 is one of four in the U.S. and one of a limited number in the world. The 140 has the capacity to lift and move 140,000 lbs (that's not a typo! Yes, 140K!!). Featuring a hydraulic riggers boom that can lift 48,000 lbs at 15 feet and 6 inch radius. This is the lift that will lift your equipment, when others can't. There's no way we can over state the absolute power and efficiency of this machine. In our biz, it is the ultimate moving beast.

Traditional jobs at this lifting capacity used to take a day to setup gantry, a day to move and a day to install. With this lift, our mobilization time is shorter, often just one day and the entire service is quicker and more efficient on your production schedules.

Want to learn more about how
this machine can cut
your rental times in half? Give us a call today.

Versa-Lifts Are Designed For **VERSATILITY**

Most recently, we recently added a new Versa-Lift 25/35 and a Versa-Lift 60/80 to our equipment inventory. These join the equipment list along with our existing 40/60 Versa-Lifts.

Designed with versatility in mind, the 60/80 Versa-Lift (in photo) can easily lift loads of 60,000 to 80,000 pounds. And if the counterweight is extended 48", this forklift can even lift 100,000 pounds!

All of these lifts have hydraulic booms and 8' forks. The Versa-Lifts are state-of-the-art machines built with only one thing in mind...Moving Machinery. The machines are available for rent by the day, week or month.
