PCB Transformer Removal,
Warehousing & Storage

"Our business is inherently dangerous but when you are dealing with contaminated elements, you have to have a grand slam partner. Whether we are moving contaminated transformers or providing storage, we guarantee we will make every effort to give you grand slam service and rates every time." Jerry Sanders

PCB Transformer Removal

It's one thing to remove a heavy piece of equipment, but it's a whole new ballgame when the equipment involves contaminated elements. The degree of knowledge and specialization is critical to make sure your company adheres to all EPA requirements for disposal as well as general safety for your employees.

In February we received a call to remove FOUR PCB transformers from a plant in Huntsville, Alabama. In four days with a crew of six, we were able to successfully complete the removal. The project included lowering the transformers approximately 30 feet, draining the fluid and executing the full removal and disposal of the contents and the transformers.

We took care of every detail and completed the work ahead of schedule. We call this a GRAND SLAM!

Our team is experienced and specialized for any job. We welcome the opportunity to be your partner too! We can help your people, or we can do

the entire job at hourly or contract rates. Visit our website to see our full line of services www.airriggers.com.

Warehousing and Storage

Do you have machinery or equipment your company is not ready to install yet? Let Associated Industrial Riggers provide the warehousing until you are ready. We can provide heated or unheated, short- or long-term warehouse space.

Recently, we transported and unloaded this equipment for a customer and will they are ready
